REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The primary reason for allowance of claims is the inclusion of the limitations of

"Fuel pressure increase estimating means for estimating an increment of said fuel pressure after stoppage of operation of said internal combustion engine on the basis of said intake air temperature and said water temperature detected during operation of said internal combustion engine, wherein said fuel pressure control means includes desired fuel pressure limiting means for limiting a maximum value of said desired fuel pressure so that a sum value of said desired fuel pressure and said increment of said fuel pressure does not exceed a critical actuation pressure of the fuel injection valve beyond which a failure of fuel injection may occur." in claim 1, and

"A normally closed type electromagnetic pressure control valve provided to make it possible to establish communication between an intake port of said high pressure fuel pump or alternatively said fuel tank on one hand and said fuel rail on the other hand; and pressure reduction control means for opening said electromagnetic pressure control valve immediately after stoppage of operation of said internal combustion engine. " in claim 2 that the prior art of record neither taught nor suggested.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
